Introduction

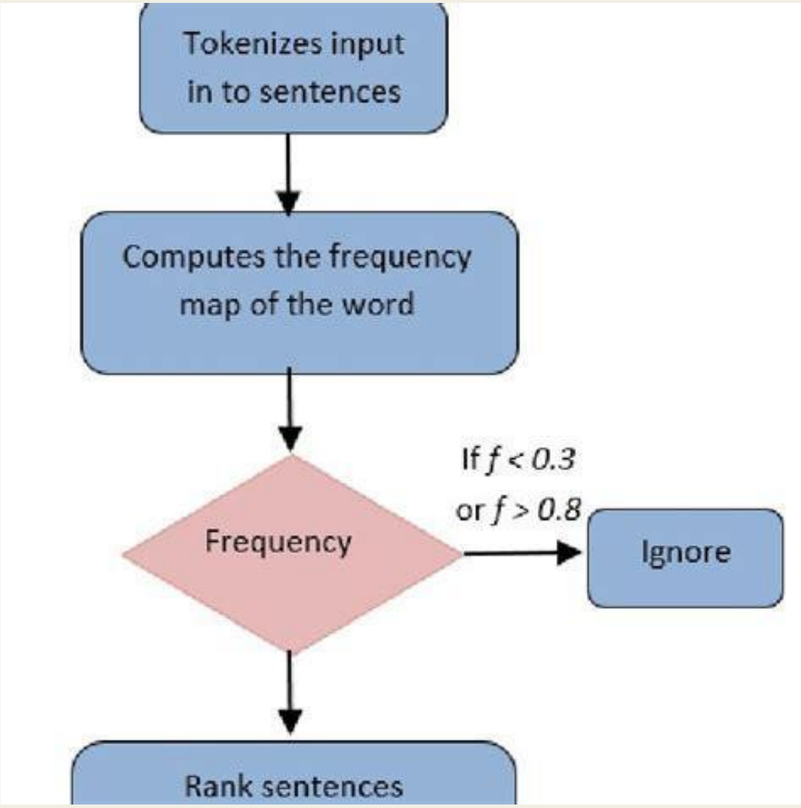

Text Summarization and Insightful Response (TSR)

Text Summarization

Question Answering over Context

Background

Summarization :

- Rule based techniques
- Extractive methods

Question Answering :

- Models such as DCN+ and S-Reader
- Relied on structured data sources or manually collected data.

Proposed Methodology

Summarization :

3 main techniques :

- Stuffing
- Map Reduce
- Refining

Question Answering over context:

- Utilizing a vector store and word embedding to store context.
- Using similarity index to generate prompts for LLM.

Tools and Resources

Langchain : It provides tools for a variety of tasks such as :

- Web Loaders
- Document Loaders
- Prompt Templates
- Language model chains
- Chat Model chains

OpenAI API :

Different LLM models for summarization and QA tasks such as :

- gpt-3.5-turbo-16k
- davinci-002
- gpt-3.5-turbo
